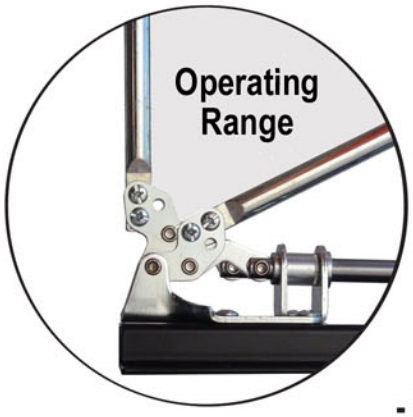
MILESCRAFT®
Always the Better Idea.

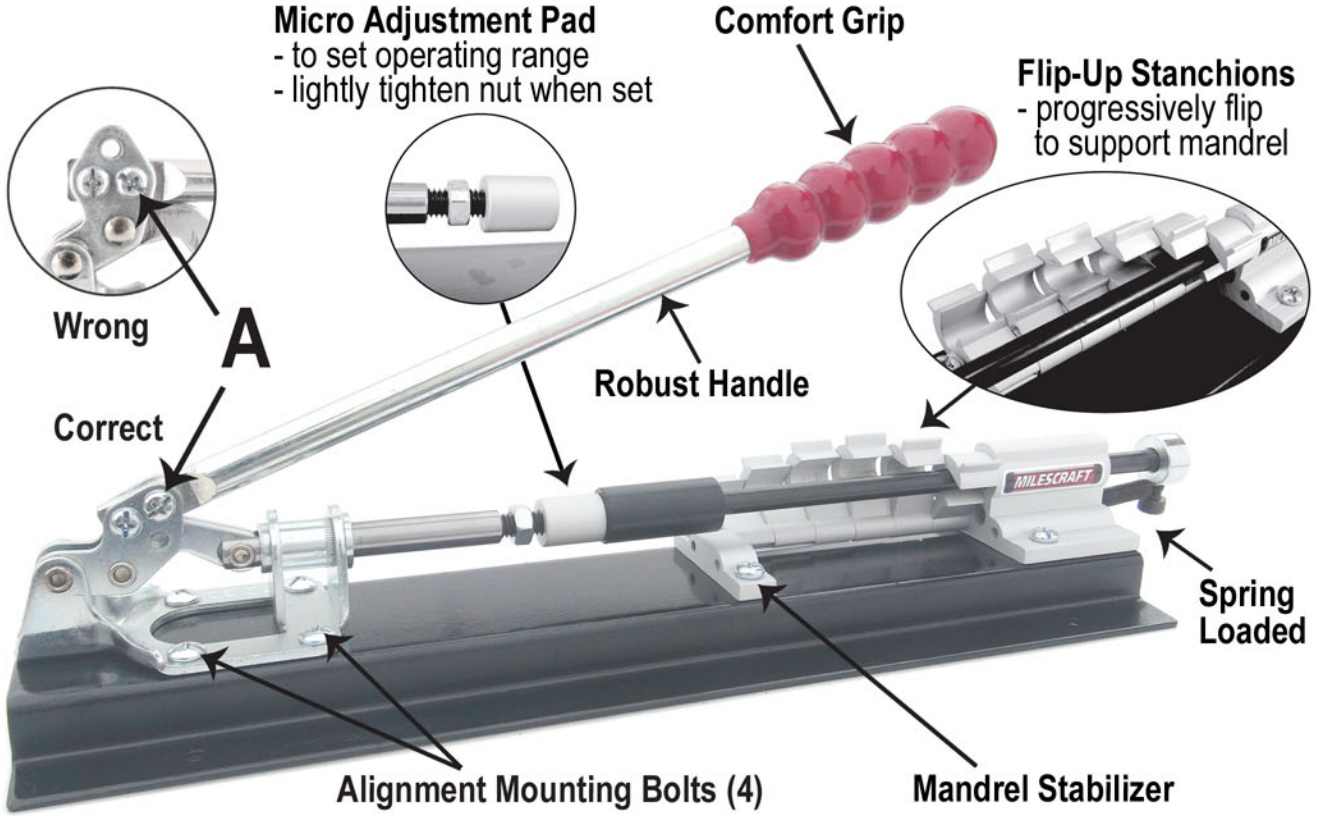
TurnersPress
Join turned projects of all types

Important!
Straight out of the box, the handle of this press needs to be re-positioned.

Before use:
- Remove handle bolt "A"
- Lift handle as shown
- Re-install handle bolt.

Operating in Wrong position voids warranty.





Caution:
- For reliable operation, only apply force in Operating Range.
- Project tube MUST be clean of all glue residue before attempting assembly.
- Ensure tube ends are free of damage or burrs and align parts well when assembling.
- Precision alignment of micro-adjust pad is made by loosening four mounting bolts.
- Service sliding and pivoting points with light oil. Periodically tighten all bolts.
- For assembling commercially available pen kits. NOT for DIY bullet pens.
